From,
Soju Raju,
Std 5th a,
Acts Secondary School.

Dear Sir,

I am from conserve my campus we have kept our group name as "WATER".

1. Without water nobody can live.
2. Water is use for drinking, washing and

bathing.

3. Polluted water will cause diseases.
4. We should drink clean and pure water.
5. In dirty water millions of germs.

Thanking You,

Your's Sincerely,

Soju Raju

Dear Sir,

I felt very happy at first. It was the first round , the written quiz.I thought that I would have failed in the first round itself.they gave us the question paper. when I got the question paper,I was very shocked to see the question paper because,the questions were not from the books we read already and the books now.but they were easy to answer.after 2 days they gave us the results of the quiz.Iwas lucky to be passed.On the next week it was the activity round.They made some groups and our group name was "B".I was happy to make new friends.The activity was not that tough.I was the leader of the team.they selected 60 members from our school.the last round was the introgation round.they asked many questions.I was happy to answer all the questionsAnd at last I was happy to become a GREEN AMBASSADOR.

Thanks

Hi Sir,

I am very happy for being an green ambassador as a team member (Aishreeya). It was our first class and we all were exited and we sure that we will do best in saving energy.

- 1) We have stuck our electricity bill on the sheet of paper.
- 2) The teacher have selected five groups. Eight member were in the group
- 3) We have selected our group name as (Water)
- 4) Teacher have selected leaders for each group
- 5) Mr.Prashanth Sir have told about the project which was on globe warming

With Love and affection

Aishreeya)

Dear Sir,

I am really sorry as I was not able to reply for the messages you had sent me due to some technical problems.

Regards,

Shravanthi (a member of "**Conserve My Campus**")

In the previous session we watched many things about global warming, ecosystem and biodiversity. We got a paper full of stickers of different animals, we had to stick those pictures in their correct place. Then we made a very very big web and I was a kingfisher. Then we had to do a chart of forest ecosystem we used many natural things and made it. We started doing this forest ecosystem on yesterday, we had no time but also we tried hard and made it. Today, we watched many things about energy sources. Then we got a puzzle three pieces were taken from that then we did half and our leader brought those three pieces and we finished our volcano picture at last our leader went and explained about the volcano.

Respected Prashant Shetty Sir,

I am Shambhavi from Acts Secondary School, Hosur Road, Bangalore VIth std student. I am really happy to part of conserve my campus team. Conserve my campus is really fun and I like the activities to protect the planet earth and the environment.

I pledge to protect and conserve the environment.

Thank you once again.

Regards
Shambhavi.

Hi sir,

I Aishreeya from class 7 want to share my experience to you. I am going to talk about my 4th class of conserve my campus. FIRST, Our teachers gave us our home assignment and explained us how to do it. Then Mrs. Bindu wrote today's activity on the board. The activity was to count different electric appliances in the christalaya.

Mr. prashant sir told us the voltage of the electric appliances and told us to multiply the number of appliances, voltage and the time we use the appliance per day.

Myself and my team had lot of fun counting and workouting. I wish this could be continued.

yours faithfully

S. AISHREEYA.
